

# WSA Production Flow Hierarchy 2050

Steel Demand Model - Forecast Report

## WSA Production Flow Hierarchy - 2050

This diagram replicates the official WSA Production Flow Hierarchy with 2050 forecast volumes.

## Production Flow Summary - 2050

---

Category	Volume (kt)	Share (%)
Apparent Steel Use (crude steel equivalent)	nan	0.0%
Apparent Steel Use (finished steel products)	nan	0.0%
Production of Continuously-cast Steel	nan	0.0%
Production of Hot Rolled Coil, Sheet, and Strip (<3mm)	nan	0.0%
Production of Hot Rolled Flat Products	nan	0.0%
Production of Hot Rolled Long Products	nan	0.0%
Production of Ingots	nan	0.0%
Production of Iron Ore	nan	0.0%
Production of Non-metallic Coated Sheet and Strip	nan	0.0%
Production of Other Metal Coated Sheet and Strip	nan	0.0%
Production of Pig Iron	nan	0.0%
Production of Railway Track Material	nan	0.0%
Production of Wire Rod	nan	0.0%
Total Production of Crude Steel	nan	0.0%
Total Production of Tubular Products	nan	0.0%
True Steel Use (finished steel equivalent)	nan	0.0%
<b>Total</b>	<b>nan</b>	<b>100.0%</b>

*Based on official WSA Production Flow Hierarchy diagram Volumes represent Track A forecasts mapped to WSA categories*
